

Titanium Tube RFQ Checklist

A practical checklist for heat exchanger, condenser, and evaporator tube inquiries

Provide the following information to reduce clarification cycles and support a controlled review of grade, route, inspection, packaging, and delivery requirements.

1. Buyer and Project Information

Information item	What to provide
Company name	Required
Country / region	Required
Contact person and email	Required
Project name or end-use	Recommended
Delivery destination	Required
Required delivery date	Recommended

2. Product Definition

Information item	What to provide
Product / application	Heat exchanger / condenser / evaporator / other
Material grade	Example: Grade 2 or Grade 12
Applicable standard	Example: ASTM B338 or ASME SB338
Manufacturing route	Seamless / welded / open for review
Outer diameter (OD)	Required; include units
Wall thickness (WT)	Required; include units
Length	Required; fixed, random, or maximum
Quantity	Number of tubes and/or total weight
Surface / condition	State when specified
Tolerance / drawing reference	Attach the controlling document when applicable

Use explicit units. Example: OD 25.4 mm × WT 0.9 mm × L 6000 mm. Decimal dot and decimal comma can both be preserved by the website RFQ preparation interface.

Inspection, Packaging and Email Preparation

Complete the applicable fields and attach the controlling purchase specification, drawing, or quality plan in your own email application.

3. Inspection / Documentation	What to provide	4. Packaging / Commercial	What to provide
Mill Test Certificate	State required format	End / surface protection	Special requirements
Chemical / mechanical results	State project requirements	Packaging structure	Bundle / case / reinforced support
Eddy current / electromagnetic	Required / not required / per standard	Marking and labels	Heat, lot, PO, item or other data
Ultrasonic test	Required / not required / per standard	Incoterm / destination	Preferred basis
Hydrostatic / pneumatic test	Method and acceptance basis	Quotation currency	Optional
Dimensional inspection	Sampling or 100% requirement	Special compliance	State before quotation
Third-party inspection	Agency / witness point		
Additional documents	ITP, QAP, drawing, vendor requirements		

5. Recommended Attachments

- Purchase specification or data sheet
- Inspection and test plan or quality requirements
- Required MTC / document format sample
- Drawing with dimensions and tolerances
- Tube sheet or equipment drawing when relevant
- Packing, label, or shipping-mark requirements

Email Preparation Workflow

The website prepares an RFQ summary in your browser and can open your email application. Information is not uploaded or stored by the website. Attach drawings and supporting files before sending.

Suggested email subject

RFQ | Titanium Tube | {Company} | {Country}

Copy-and-Paste RFQ Summary

Company: _____	Country: _____
Contact / Email: _____	Product / Application: _____
Grade: _____	Standard: _____
Route: Seamless / Welded / Review	OD × WT × L: _____
Quantity: _____	Testing / Inspection: _____
Third-party inspection: _____	Destination / Incoterm: _____
Required date: _____	Remarks: _____
